ACCELERATING TO iMANAGE CLOUD

Empower knowledge workers to be productive from anywhere in a safe, secure environment

iManage
Cloud

Make the business case for the cloud. Don't swap your on-premises system for just any cloud alternative. When you evaluate cloud solutions based on performance, technology, and business impact, the best option is clear. With iManage Cloud your firm will experience measurably improved business outcomes for years to come.

Business benefits

Cloud security is safer
iManage engineers every aspect of our cloud services to meet the most rigorous security and compliance needs.

Predictable costs
When you move to the iManage Cloud, you eliminate the need to invest in on-premises infrastructure and gain industry-leading security, performance, and agility.

Better governance
Optimal use of iManage Cloud not only ensures the data is securely stored but also enables governance, control, and auditability of people and the content they can access.

Modern user experience
With iManage Cloud the end user will find much more adaptability, ease of use, and freedom to collaborate, access, and exchange information — anywhere, any time, on any device.

Increased business agility
As technology evolves iManage Cloud brings exponentially more value to the business, compared to on premises, as core infrastructure is leveraged to create and deliver a broader array of software and services.

> We knew we wanted to move to the cloud to make it easier to work remotely, improve security, and have the most up-to-date version.

Key features:

- Standardizing on iManage Cloud offers a foundational customer-specific encryption solution to meet the most stringent security requirements.

- iManage Zero Trust architecture delivers cutting-edge security protections for data by eliminating implicit trust between services.

- Need-to-know security secures access to all content and communications at client, matter, project, or department level-taking a programmatic approach to security.

- Detect internal and external threats using AI and behavioral modeling to identify unusual behavior quickly and accurately, providing auditable records.

- Apply ethical walls to secure sensitive data to relevant users or groups easily without compromising productivity and collaboration.

- Partnership with Microsoft supports seamless integration with Office 365, enabling productivity across commonly used applications while maintaining security.

- Modern mobile experience with a consistent Work interface and tools to manage device access allowing seamless productivity.

- Mobile security and compliance, at enterprise scale, protects apps and data with granular security policies to address data loss prevention.

Readying you for the future

You want to empower your users with the latest functionality and you need to quickly achieve successful adoption. iManage has helped more than 1500 customers transition to our Cloud with more than 50 implementation partners ready to support your cloud project. Assisted by seasoned iManage experts and our highly skilled partners, you can relax – you've got this.

Security is at the center of what we do

“ ”

When the users started work on Sunday and Monday, they couldn't tell that they weren't on-premises. In fact, I even had a few attorneys contact me and say, 'Hey, did we actually move to the cloud?, Because the performance is as good as it was on premises.

David Melczer, Director of IT
Greenbaum, Rowe, Smith & Davis LLP

About iManage™

iManage is the knowledge work platform that helps organizations to uncover and activate the knowledge that exists in their business content and communications. By leveraging the context of information and data, iManage goes beyond basic productivity, empowering data-driven insight that drives successful business decisions and outcomes.
